

Creating a 'Mini-Holland' in Waltham Forest

Cllr Clyde Loakes - Deputy Leader

LB Waltham Forest

What is Enjoy Waltham Forest all about...?

**WALK
CYCLE
ENJOY**

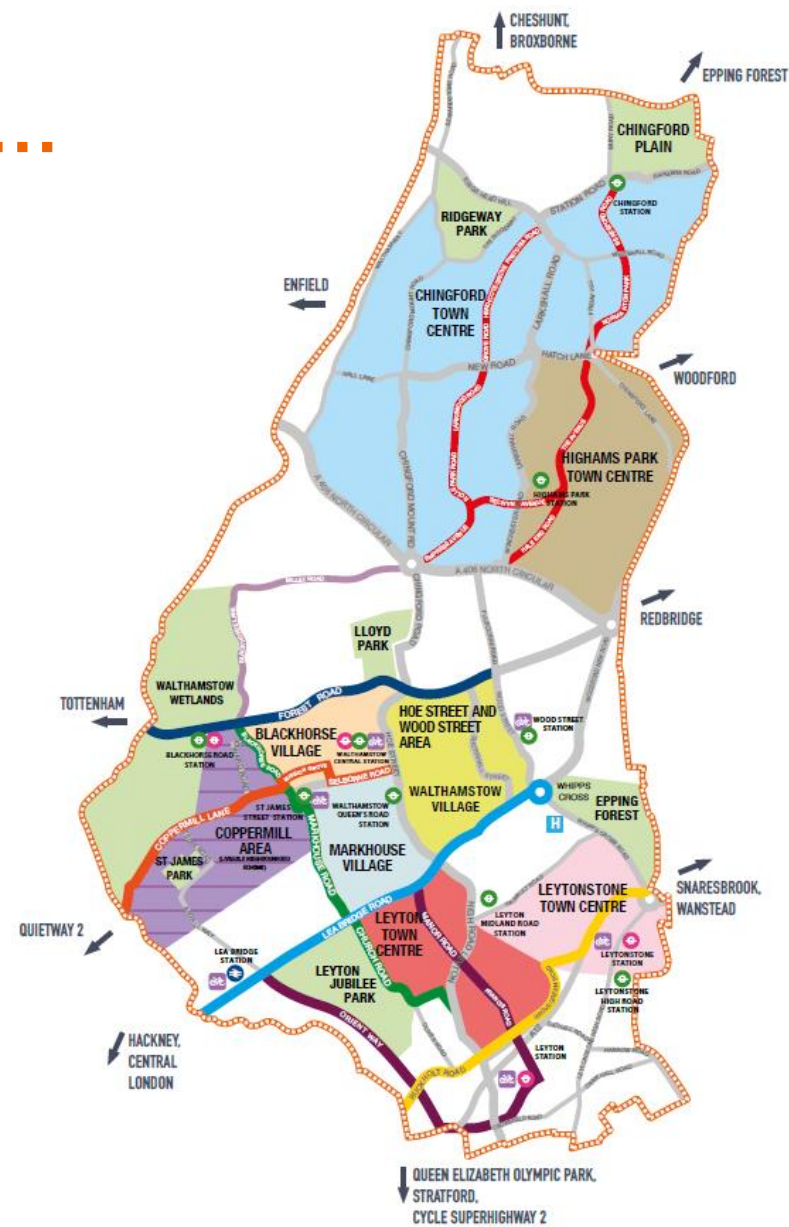

Enjoy Waltham Forest objectives...

- 1 A network of direct joined up cycle routes
- 2 Safer streets for the bike
- 3 More people travelling by bike
- 4 Better places for everyone
- 5 Better balance between movement and place
- 6 International best practice
- 7 Attract growth
- 8 Supporting other corporate objectives

Enjoy Waltham Forest vision...

- Lea Bridge Road – *a street for everyone*
- Walthamstow Village schemes
- Town Centre schemes
- A network of excellent cycle routes
- Complementary measures
- Cycle hubs

**WALK

What have we done?

**WALK
CYCLE
ENJOY**

Case Study: Orford Road- Local Traffic Neighbourhood

During - Walthamstow Village (Orford Road) Low Traffic Neighbourhood Construction

Before - Walthamstow Village (Orford Road)

**WALK
CYCLE
ENJOY**

After - Walthamstow Village (Orford Road)

“There was a buzz on Orford Road yesterday and it was so nice to see people of all ages enjoying time outside, socialising and making the most of the extra space. In the past we have been shocked by how fast cars drive down Orford Road and the pavements can be really cramped with people and buggies! It was just great to see people of all ages sitting outside and it seemed like the local shops were doing a swift trade.”

Walthamstow Village

Impacts of scheme

Road	Before the trial	After the trial	Difference before and after the trial	Percentage change
Addison Road	2894	2261	-633	-22%
Beulah Road	363	459	96	26%
Grosvenor Park Rd	1445	952	-493	-34%
Grove Road	3118	729	-2389	-77%
Orford Road	2525	579	-1946	-77%
Pembroke Road	2618	1444	-1174	-45%
Shernhall Street	4444	1340	-3104	-70%
Wingfield Road	996	232	-764	-77%
Copeland Road	2625	69	-2556	-97%
Eden Road	648	52	-596	-92%
East Avenue	2079	2912	833	40%
West Avenue	1951	161	-1790	-92%

Improved local high streets

Leyton Town Centre (Francis Road)

Francis Road has been transformed with a timed motor vehicle restriction, enhancing the local retail economy by providing accessible paving and an improved public realm with new greening and planting.

**WALK
CYCLE
ENJOY**

Introduced world-class segregated cycle tracks

Lea Bridge Road

Visitor problems

Greened walking and cycling routes

Lea Bridge Road (Lee Valley Park)

Greening streets is a key part of the proposals throughout Waltham Forest. Many people want to see more trees in their area, and by increasing planting we can help tackle poor air quality and make our routes more attractive for people walking and cycling.

**WALK
CYCLE
ENJOY**

Created new pocket parks and green spaces- places for people!

**WALK
CYCLE

Before and after: Whipps Cross

Roundabout to T-junction

Blended Crossings

People turning into side roads in cars should always give way to people who have started to cross as described in the Highway code. **Rule 170 of the Highway Code states - Pedestrians that have started to cross the side road have priority over vehicles turning into the side road.**

Blended crossings are designed to slow down vehicles when entering or exiting side roads and encourage vehicles to give way to pedestrians crossing the road, reinforcing the rules of the Highway Code.

Summary of achievements

51 Modal Filters introduced
with more already planned

30KM of Segregated
and Semi Segregated
Cycle Lanes built

800 new trees
planted

400+ Cycle
Hangars
installed- a
further 100+
planned

Cycling increased by
103%
Car usage dropped
7%

91 safer junctions
through the introduction
of blended crossings

24 tiger crossings
have been installed

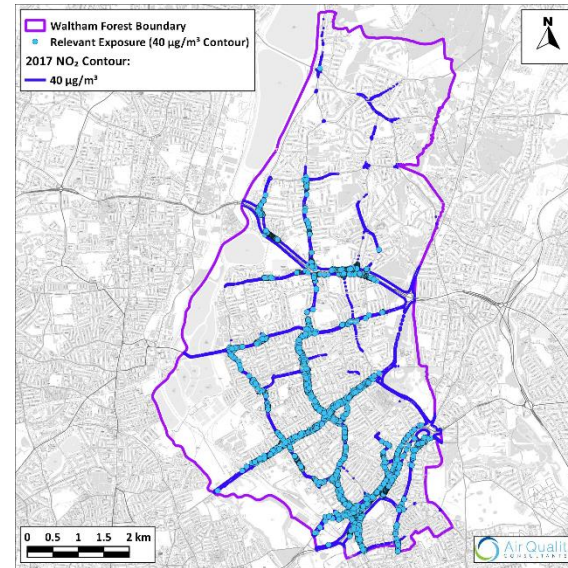

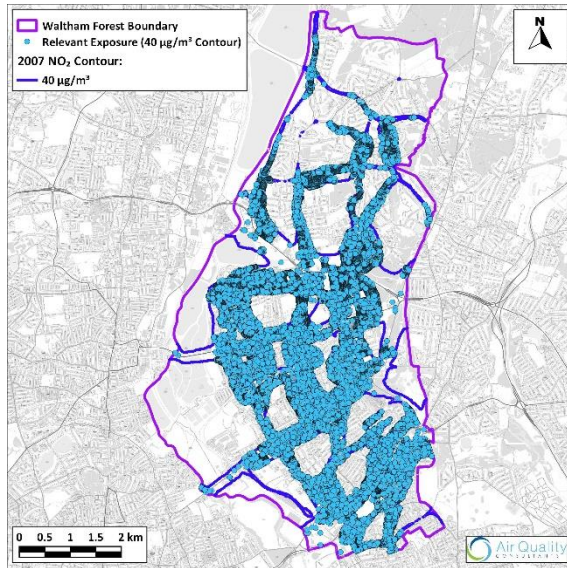

850 on street car
parking spaces
removed in 2019
alone

118 pedestrians
crossings
improved

15 new 'Pocket Parks'
created from former
road space.

The Cycle Park and Go
network provides
472 spaces in 7 cycle
hubs next to London
Underground, Overground,
and National Rail stations

Air Quality

King's College London report concluded that Waltham Forest residents are expected to gain up to 6 weeks of life expectancy if pollution levels decline as predicted as a result of the Enjoy Waltham Forest programme. Between 2013 and 2020 on popular cycle routes, exposure of NO_2 is predicted to reduce by up to 25 per cent and by up to 13 per cent for $\text{PM}_{2.5}$. Households exposed to toxic air levels down from 58K to 6,300.

Table 5

NO₂ exposures while cycling in Waltham Forest

Route	2013 NO ₂ (µg/m ³)	2020 NO ₂ (µg/m ³)	Percent change
Chingford Station to Leyton Station [Segregated*]	54	42	22%
Lea Bridge Station to Whipps Cross [Segregated*]	59	44	25%

What Next?

- All highways and transport schemes are now seen through the prism of #HealthyStreets and #LowTrafficNeighbourhoods whether a basic resurfacing or parking scheme, there are positive interventions to be made. We have loads we can still do and want to do
- Lobby for 20mph to be the UK default speed in urban areas, with powers to enforce implemented and utilised by the police or local authorities
- Campaign for a 21st Highway Code that has its heart the embodiment and defence of #HealthyStreets and #LowTrafficNeighbourhoods, over the needs and demands of the private motor car

Thanks!
